## 20TWENTY OUTDOOR COLLECTION

### BROWN JORDAN

The most recent collaboration between Brown Jordan and guest designer Richard Frinier, the 20TWENTY collection of outdoor furniture balances softened angles and tapered legs with hardy materials to create comfortable and welcoming destinations.

Back and armrests are made from hand-woven Resinweave, a durable synthetic fibre, and provide a textural counterpoint to the powder-coated aluminum base and tapered legs. The series includes lounge elements with optional integrated end tables, ottomans and ottoman tables as well as three sizes of bunching tables with ceramic or teak surfaces, all of which can be used independently or secured together via discrete clip-on connectors.

The main elements are offered in two nature-inspired colourways, while the Suncloth upholstery textiles come in three complementary colourways.
